

## SYNQ Gates

Individual applications  
may differ in appearance.

## How It Works

SYNQ's unique approach to EAS works by combining our discreet Hi-Frequency labels with smart camera technology to bring you video of suspicious incidents exactly when you need it.

**Thermal Scale Tags**  
Customized tags allow us  
to cater to your business'  
unique needs at an  
affordable price.

**Loss Prevention**  
Highly sensitive customized  
gates can deter theft before  
it occurs. Cameras log  
suspicious event 2 seconds  
before gate entry.

**Video Notification**  
Know instantly when  
suspicious events occur.  
Any party can receive a  
push notification.

**Review & Identify**  
High resolution imaging  
enables you to identify  
sources of theft.

## Retail EAS Systems

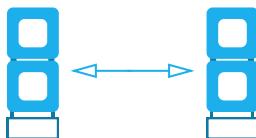

SYNQ is the only company in North America to provide integrated EAS thermal scale labels, compatible with all meat & deli printers.

Low-profile white and black EAS tags available.

Stop theft of most commonly stolen items: meat, cheese & liquor.

High frequency tags allow for large exits.

Our EAS tags are compatible with your existing printer.

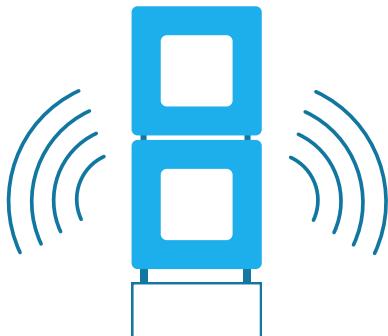

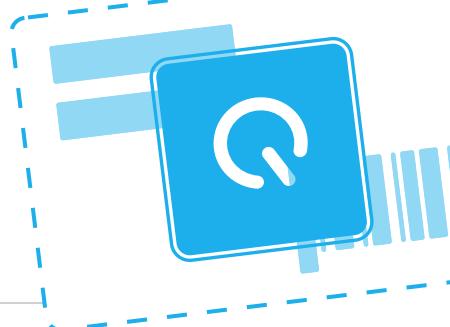

BIZERBA

DIGI

HOBART

ISHIDA

METTLER TOLEDO
